

Take each of the following 9 statements and cut them out and stick them alongside the line graph to which they relate. Alternatively, you could write them out beside the graph.

- 1. The highest temperature of the week was on Friday. The temperature on that day was 38°C.
- 2. The **range** in temperatures for the week was 8°C.
- 3. The temperature on Sunday was 32°C.

- 4. The temperature on Friday was 39.5°C.
- 5. The lowest temperature was on the second Sunday (37.5°C).
- 6. The **range** in temperatures was approximately 4.5°C.
- 7. The lowest temperature was on the second Sunday (94°F).
- 8. The **range** in temperature was 6°F.
- 9. The difference in temperature between Monday and Tuesday was 3°F.

Now see if you can write 2 more statements for each graph.
